

IN THE SPECIFICATION

Please amend the paragraph beginning on line 1 of page 12 as follows:

The coated glass article of the invention is ideally suited for use in architectural glazings. For example, the coated glass article may be utilized in an insulated glass unit. Thus, the coated glass article of the present invention is illustrated in FIG. 3 as an outboard lite 45 in an insulated glass unit 43 suitable for installation into a building structure. The insulated glass unit 43 also includes an inboard lite ~~53~~ 50 made of a glass article and maintained in a spaced apart relationship from the outboard lite 45 by a frame (not shown) in the known manner. The glass substrate 47 of the present invention is positioned facing the exterior of the structure. The multilayered coating 49 of the present invention faces the interior with an air space 51 separating the outboard lite 44 from the inboard lite ~~53~~ 50.
